Sperluft = 0,5 – 0,8 bar gereinigte, trockene Luft
 Schlauch d_1 = 4 mm, Schlauch D_2 = 6 mm
Sealing air = 0,5 – 0,8 bar cleaned, dry air
Hose d_1 = 4 mm, Schlauch D_2 = 6 mm

A technical drawing of a cylindrical component. The top part shows a flange with a central hole and two side holes. Below the flange is a vertical section with a diameter of 199 Ø. The total height of the main body is 212. A horizontal dimension of 98 is shown from the center of the bottom flange to the right edge. At the very bottom, there is a circular base with a central hexagonal hole and a dimension of 122.

* möglichst über den gesamten Bereich ganzflächig spannen. *If possible, clamping should encompass the entire surface area.*
